EDUCATION

National University of Singapore

Singapore

B.Comp (Hons) in Business AI Systems, Minor in Economics, Specialisation in Financial Technology Aug 2024 – Dec 2027

- **Activities:** Marketing & Welfare Director @NUS Students' Union (NUSSU); Software Engineer @NUS Fintech Society
- **Programme:** NUS Overseas College (Jakarta, Indonesia), Product Launchpad (PLP) x PayPal Singapore
- **Hackathon:** Tiktok TechJam '25, CatalystX '25, Google AI Cloud Partner Catayst '25, Hack&Roll '26, Hack4Good '26

Singapore Polytechnic

Singapore

Diploma in Computer Engineering

Apr 2020 – Mar 2023

- **Awards:** Director's Honour Roll (AY 21/22)
- **Certification:** Huawei Certified ICT Associate (AI) | **Hackathon:** DSTA BrainHack '21

EXPERIENCE

Shopee Pte Ltd

Singapore

Business Analyst Intern

May 2026 – Aug 2026

- Generated weekly policy reports and analyzed market segments to design user surveys, collaborating with local teams to identify core Returns & Refunds bottlenecks.
- Built and automated daily SQL data pipelines from Shopee's internal warehouse to support recurring operational analysis and process improvement.

Horizon Labs

Singapore

Software Engineer Intern

Jul 2025 – Oct 2025

- Built high-throughput backend services using FastAPI, seamlessly integrating Microsoft Azure data pipelines with the intention to scale core application features and eliminate data bottlenecks.
- Designed responsive React and TypeScript front-end components, accelerating agile project execution and streamlining platform management workflows.

GoTrade (YC S19)

Jakarta, Indonesia

Data Analyst Intern

May 2025 – Aug 2025

- Assessed over 500,000 transaction records to extract actionable intelligence, directly driving strategic planning initiatives for a rapidly growing user base of 100,000+ active users.
- Automated KPI dashboards using SQL and Python, entirely eliminating manual data entry and saving 5 hours of managerial time per week.

CHB Technology Pte Ltd

Singapore

Systems Administrator Intern

Feb 2022 – Aug 2022

- Organised a team of engineers to execute complex server deployments across hybrid environments, establishing standard operating procedures to drastically reduce future migration times.

PROJECTS

Olist Market Analysis

Apr 2025

- Investigated customer data using Pandas and NumPy to diagnose a critical 93.6% churn rate, utilizing KeyBERT sentiment classification to statistically correlate negative rating volume with logistics delays.
- Conceptualised a "Geo-Smart" framework by visualizing retention metrics across 26 states via interactive Tableau dashboards, aiming to optimize customer engagement and revenue during seasonal peaks.

CanOrNot

Aug 2025

- Managed a team of 4 engineers to architect a complex regulatory RAG pipeline, strategically delegating tasks to successfully deliver the project within a strict 48-hour hackathon deadline.
- Implemented rigorous development standards by containerizing the application and leading code reviews, ensuring a seamless, bug-free deployment for the final pitch.

AuroraMart

Nov 2025

- Programmed a hybrid recommendation system using Scikit-Learn, processing 8+ demographic data points per user to highly personalize feeds across a catalog of over 500 SKUs.
- Engineered a real-time notification layer utilizing Django Channels, enabling instant order status tracking and live chat for concurrent users while completely eliminating polling overhead.

TECHNICAL SKILLS

- **Data & Databases:** SQL, Pandas, NumPy, Matplotlib, Tableau, Metabase, MongoDB
- **Languages:** Python, Java, R, JavaScript, TypeScript, HTML, CSS
- **Frameworks:** React, Node.js, Next.js, Django, Flask, Tailwind CSS
- **DevOps & Tools:** Jira, Figma, Power Automate, AWS, Azure, Datadog, Docker, Git, Vercel
